DriverSafe 360 Workshop

Overview

In this fast paced highly interactive workshop, with online voting and engagement, our expert trainer will lead the drivers through a thought-provoking session whilst providing solutions to improve their safety on the road.

By gaining an awareness of key factors which can affect driving such as fatigue, distractions, impairment, hazards, speed and being informed on safer driving techniques, this workshop will reduce your company's vehicle running costs through improving driver safety, minimising collision rates and reputational damage.

At the end of the workshop, drivers will be able to:

Identify their own driving style and understand how the state of mind influences driving and the decision-making process

Develop eco-safe driving skills and the importance of good observations, anticipation and forward planning

Understand the risks associated with distracted driving and the effects of drink and drugs, especially after the night before

Identify varying speed limits on our roads, application of appropriate speed and for different vehicle categories

Delivery method

The workshop is facilitated by a professional driver trainer who will fully engage with participants to maximise the learning experience, draw out participants' views and opinions.

“Marie was an excellent trainer and facilitator. Content was articulately delivered and she allowed participants to raise any concerns or challenges they had and responded both professionally and appropriately”

Steven Larder, Shell UK LTD

Delivery formats available:

Classroom workshop

- Duration: **3.5** hours
- Delegates: up to **16** drivers

Virtual classroom live

- Duration: **3.5** hours
- Delegates: up to **16** drivers

Workshop benefits

Reduce your drivers' risks

Education will reduce driver risk, collision rates, fleet costs and reputational damage

Meet your duty of care

Our courses are designed to help you meet your duty of care obligations

Improve your drivers' on-road competence and knowledge

- Recognition and management of speed
- Hazard awareness and forward planning
- Driver impairment (drink, drugs, mobiles, vehicle technology)

Who should attend?

Anybody who drives a vehicle for work purposes, including cars, vans, LCV (Light Commercial Vehicle), LGV (Large Goods Vehicle) or PCV (Passenger Carrying Vehicle).

Workshop outline

Introduction

By exploring a fictitious incident on the road, this course will investigate the key rationale and reasoning as to why it occurred and what could have been done to prevent it.

The course will cover a number of subjects including:

Awareness, anticipation and planning

Speeding vs inappropriate speed

Impairment through drink and drugs

Distractions

Factors affecting collisions: the driver, the vehicle, the road

Consequences for drivers: family, friends

The concept of avoidability – could this crash have been avoided?

Lessons learnt

Logistics

For **online workshops** our preferred option is to use Zoom or Teams and Mentimeter online voting.

In order to facilitate your workshop via our virtual classroom format all attending will need:

A **Computer, Laptop or Tablet**

(Mobile phones are not suitable to undertake the course due to the size of the screen but are required for the online voting and interaction element of this course.)

All devices must have:

- Internet access
- Web camera
- Microphone
- Speakers or headphones
- Stable internet connection
- Enough battery charge for at least 3 hours

Logistics

For **real time classroom workshops**, we request that clients confirm they have:

- A suitable room is available for up to 16 delegates
- The ability to project onto a clear white wall
- Internet access
- Each candidate with a mobile phone
