

Winter Driving Awareness Workshop

Developing safer driving behaviours and reducing your fleet running costs

- Duration 90 minutes
- Delegate numbers 12 online
- Formats available

Virtual classroom live

Overview

In this highly interactive workshop, our expert trainer will lead the drivers through a thought-provoking session whilst providing solutions to improve their safety on the road for driving in winter conditions.

By gaining an awareness of key factors which can affect driving in the winter such as tyre choice, safety checks, understanding understeer and oversteer skids and aquaplaning, this workshop will reduce your company's vehicle running costs through improving driver safety, minimising collision rates and reputational damage.

At the end of the workshop, drivers will be able to:

Identify their own driving style and understand how they may need to alter their driving mindset to compensate for driving in adverse conditions.

Develop an understanding of the importance of good observations, anticipation and forward planning

Understand the risks associated with winter driving and the effects that speed, cornering and braking can have in extreme conditions

Identify varying speed limits on our roads, application of appropriate speed and braking distances for different vehicle categories

Delivery method

The workshop is facilitated by a professional driver trainer who will fully engage with participants to maximise the learning experience and draw out participants' views and opinions.

Delivery formats available:

Virtual classroom live

- Duration: **90** mins
- Delegates: up to **12** drivers

Workshop benefits

Reduce your drivers' risks

Education will reduce driver risk, collision rates, fleet costs and reputational damage

Meet your duty of care

Our courses are designed to help you meet your duty of care obligations

Improve your drivers' on-road competence and knowledge

- Recognition and management of speed and braking distances
- Hazard awareness and forward planning
- Identification and remedy for the various types of “loss of control” skids

Who should attend?

Anybody who drives a vehicle for work purposes, including cars, vans, LCV (Light Commercial Vehicle), LGV (Large Goods Vehicle) or PCV (Passenger Carrying Vehicle).

Workshop outline

Introduction

Behavioural aspects of driving

Explore typical driver behaviour and how much we adjust to driving in bad weather.

- The key important questions to ask yourself before driving
- Do I know what I am doing?
- Is my vehicle suitable ?
- Do I know what terrain I may encounter?
- How confident am I the situation won't get worse?
- Tyre safety (and how they work)
- Additional vehicle checks

Losing Control

What is the difference between understeer and oversteer, and how will it impact on my ability to remain in control.

Aquaplaning: Why does it happen and how can we manage the risks associated with it.

Understanding weather

How is the weather reported ? and how to understand how weather warnings could impact on my driving.

Effective weather management

- Understanding stopping distances in different conditions
- Driving in the rain
- Defining appropriate speed
- Being prepared for your journey

Workshop review

- What drivers are taking away
- Any lightbulb moments
- Revisit 'what do you want to get out of today'
- Q & A

Logistics

Our Winter Driving Awareness Workshops are designed to be taken online via Zoom or Microsoft Teams . In order to facilitate your workshop all attending will need:

Computer, laptop or Tablet

(Mobile phones are not suitable due to the size of the screen)

All devices must have:

- Internet access
- Microphone
- Speakers or headphones
- Stable internet connection
- Enough battery charge for at least 2 hours
